using ANT+ USB and Tanita's Free
Healthy Edge Lite Software**

BC-1500 InnerScan PRO

MULTI-FREQUENCY, SEGMENTAL BODY COMPOSITION PLATFORM

Tanita's FDA cleared BC-1500 InnerScan Pro, Multi-Frequency, Radio Wireless, Segmental, Body Composition Monitor communicates using ANT+™ radio wireless technology, providing in-depth information about your body. This information allows you to accurately monitor the impact of your diet and fitness program. The BC-1500 InnerScan Pro gives you more information than standard body composition monitors. This unique product gives individual body composition readings for each body segment: trunk, right arm, left arm, right leg and left leg.

The BC-1500 InnerScan Pro is especially useful for anyone who is monitoring the balance of left and right side of body or trying to build or rehabilitate a particular part of one's body. The BC-1500 InnerScan Pro uses eight electrodes, four innovative retractable handgrip electrodes, along with four standard feet electrodes. The platform is designed to connect to your windows PC running Healthy Edge® Software, using ANT+ protocol to record, graph, and analyze your readings. In just seconds. This at-home health monitor can display a complete body composition profile, including weight, body fat % (total and segmental), body water %, muscle mass (total and segmental), physique rating, BMR, DCI, metabolic age, bone mass, muscle quality score, and visceral fat.

Tanita Connectivity

The BC-1500 InnerScan Pro *communicates* using ANT+™ Radio Wireless (with pairing) to transmit securely to multiple compatible display devices, such as:

iPhone, iPad & iPod Touch

Sense ⇌ Measure ⇌ Communicate

Measurements Include:
