

BC-549plus IRONMAN®

BODY COMPOSITION MONITOR

The highest standard in consumer full-body composition

9 full-body measurements

Highest capacity of 440 pounds

Oversized tempered glass platform

Beautiful blue backlit LCD and icons

Tanita's new development allows users to monitor body composition on clear surfaces without visible electrodes. This innovation will add to the aesthetic beauty of Tanita's unique range of tempered glass designs while providing the same high level of accuracy. This transparent electrode scale uses Bioelectrical Impedance Analysis (BIA) technology to monitor your complete body composition. Measurements include the full range of Ironman® features. Model features higher weight capacity 440lbs, wider platform size 13.4" and blue backlit LCD display.
