BF-2000 IRONKIDS® WIRELESS BODY FAT MONITOR FOR CHILDREN

Tanita's **FDA cleared** BF-2000 IronKids® body fat monitor is designed for children ages 5 to 17 years old, taking each gender's physical developmental milestones into account for accurate body fat % measurement and analysis. The BF-2000 can give parents, educators, and caregivers a true picture of children's health and fitness levels.

The Tanita BF-2000 IronKids® platform communicates wirelessly using ANT+™ technology. (USB ANT+ Stick included for use with PC.)

The platform is designed to connect to compatible devices, such as: Windows PC with IronKids® Software (**FREE**). The Tanita software will record, graph, and analyze readings on a daily, weekly, monthly, and annual basis. Ironkids® software is ideal for measuring, tracking and comparing large groups. Tanita Remote Displays and Apple MAC using the free Tanita Widget will provide the results of Weight & Body Fat%.

Tanita IRONKIDS® detailed Body Composition Report

Tanita Connectivity
