# HD-351ANT

## RADIO WIRELESS DIGITAL WEIGHT SCALE

The HD-351ANT, Radio Wireless Digital Weight Scale, is a revolution in personal health maintenance. It features a low-profile, oversized platform with a weight capacity of 440 pounds, making it the first scale available in its price range to accommodate a broader range of consumers.

The HD-351ANT will communicate with your computer using the wireless USB Stick and Tanita's new Healthy Edge® Software to wirelessly transmit your readings within seconds after stepping on the platform. The wireless interface protocol enables ultra low power applications ideal for fitness and health monitors and offers all the benefits of digital wireless communications with much lower power consumption than other wireless protocols. The HD-351ANT scale platform features no visible display, as readings are automatically transmitted to remote displays for easy viewing in various locations. This dynamic feature-the first of its kind-will allow for private readings and is perfect for anyone who wants to keep their health and fitness levels private, making the HD-351ANT the ultimate choice for discretion. When in range of a consumer's computer, the information is automatically transmitted to the computer using the wireless USB Stick and captured with Tanita's Healthy Edge® Lite and Tanita free widget for Mac.

## Tanita Connectivity
