

PD-733F

3-AXES ACTIVITY MONITOR

Health experts suggest *10,000 steps per day* is optimal for living a healthy lifestyle.

How many steps have you taken?

actual size

Wear it anywhere on your body

Measures motion on the X, Y, and Z axes

Uses advanced technology to analyze motion

Over-sized Display

14 day memory

The PD-733F 3-Axes activity monitor (pedometer) is the newest addition to the FitScan line. This model features an over-sized display for convenient tracking and viewing steps taken throughout the day.

Fitscan's 3-Axes technology uses three internal accelerometers to measure motion on the X, Y, and Z axes, allowing users to carry the PD-733F in a purse, pocket, or around the neck instead of the traditional belt clip-on. Improving convenience, and offering the ability to comfortably conceal it. This monitor also uses advanced technology to analyze motion to prevent the recording of false steps, common to inferior or less sophisticated models.

In addition to its over-sized display, the PD-733 features a step counter, distance monitor, clock, and fourteen-day memory.

Specifications:

- ✓ Daily & Total Step Counter
- ✓ Daily & Total Distance Measurement
- ✓ Clock
- ✓ Large Display
- ✓ 14 Day Memory
- ✓ Power Supply: 1 CR2032 lithium battery (included)
- ✓ Dimensions: 0.5" x 3.3" x 1.4"
- ✓ Weight: 1.1oz
