Plugs into the USB  
in your computer

Plugs into the RS-232  
port on the scale

### Optional Accessories:

- ✓ HR-200 Height Rod

# TBF-400

## TOTAL BODY COMPOSITION ANALYZER

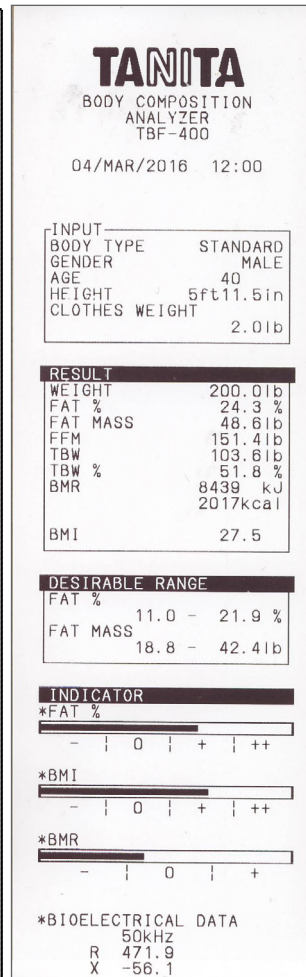

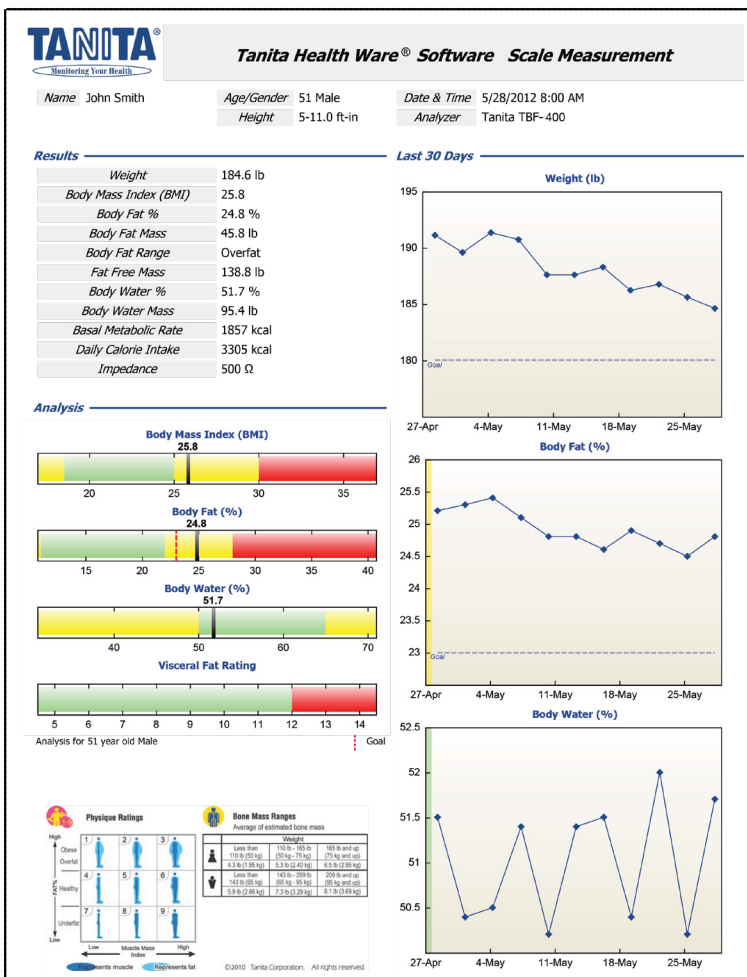

The TBF-400 features an industry leading weight capacity of 600 lb (270 kg). The new oversized, low-profile platform is ideal for weighing the elderly and obese. And the user friendly LED lamp guided navigation makes programming a simple operation. In less than 10 seconds a detailed analysis is provided on the built-in thermal printer, no need for special forms to keep cost of ownership low. Printed readings include Weight, Body Fat %, Fat Mass, Fat Free Mass, Water Mass, Basal Metabolic Rate, and Body Mass Index. Convenient indicator lights and graphs help the provider review the results. The TBF-400 can be configured as a portable model, or with a column kit to present a more clinical design.

EMR ready with multiple outputs, including RS-232, USB and SD card. When used with Tanita Health Ware® Software (sold separately) the body composition data from the TBF-400 can be stored on PC to provide custom data recording, tracking, and analysis for an unlimited number of users.

### Features:
